

# Pesticide Transportation Safety Checklist

## Your Vehicle

- A Pickup truck is best: Carry pesticides in the truck bed.
- If using a mini-van or station wagon, carry pesticides in the back of the vehicle with windows open for ventilation.
- If using a car, pesticides should be carried in the trunk.

## Inspect the vehicle before loading

- Remove sharp objects from truck bed or trunk.
- Remove unnecessary containers from truck bed or trunk to avoid confusion at site.
- Check lights, tires, mirrors, steering, breaks.

## Have the following items in your passenger seat:

- Registration form
- Protective clothing/equipment: boots, gloves, goggles, etc.  
**DO NOT PACK THESE WITH YOUR PESTICIDES!**
- A shovel to build a dike or clean up a spill
- Absorbent material for small spills
- Soap and water for cleaning hands or flushing eyes
- Tarp or plastic to cover load in case of rain
- Pesticide labels and Safety Data Sheets. These can provide important information in the event of a spill or accident.

## DO

- Keep pesticides in original containers.
- Keep containers dry.
- Secure pesticides from spilling or shifting during transport.
- Drive with care.
- After loading your vehicle, drive directly to the collection site
- Transport pesticides separately from seed, grain, or consumer goods

## DO NOT

- Mix or consolidate pesticide waste.
- Stack heavy containers on top of lighter containers.
- Transport pesticides in the passenger compartment of the vehicle.
- Transport pesticides with food, livestock or poultry feed, and
